

Kuskie Thin BD Narrative
July 27, 2011
Tara Devenport

Activity Slash at landings will be scattered (preferred) or piled and burned.
Costs and activities entered into FACTS for the BD appraisal are as follows:

Cover 28 Machine Landing Piles 59: \$35 I entered this as machine piling, because pile covering was not a menu option.

Fuel Break 2 acres: \$559.00 per acre This refers to roadside treatment. Treatment can consist of scattering fuels, hauling, chipping, or pullback.

Burn 28 Landing Piles: \$148.50 per landing

Fuel Inventory: \$9.00 per acre This is for assessing fuels, monitoring, writing burn plans, smoke reporting and fees.

10% Forest Collection Rate for Equipment and Facilities is calculated in Direct Costs.

Here are the treatments broken down by unit number:

Unit 1 – 5 landing piles and 1.5 acres of fuel break along RD 3420. Fuels should be hauled, chipped, or pulled back within 25 feet of road 3420 throughout unit.

Unit 2 - 5 landing piles and .5 acres of fuel break along RD 3420. Fuels should be hauled, chipped, or pulled back within 25 feet of road 3420 throughout unit.

Unit 3 – 5 landing piles

Unit 4 – 2 landing piles

Unit 5 – 5 landing piles

Unit 6 – 2 landing piles

Unit 7 – 4 landing piles and .5 acres of fuel break along RD 3420. Fuels should be hauled, chipped, or pulled back within 25 feet of road 3420 throughout unit.

Unit 8 – 8 landing piles and .25 acres of fuel break along Rd 3420. Fuels should be hauled, chipped, or pulled back within 25 feet of road 3420 throughout unit.
